DETAILED ACTION***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

Applicant's arguments see pages 7 – 9, filed May 8, 2009, with respect to claims 1 – 3, 7, 9, 10, and 14 – 16 have been fully considered and are persuasive. In particular, independent claims 1, 14, and 15 are allowable over the prior art of record since the cited references taken individually or in combination fail to disclose controlling by an individual the change between stable operating modes of a hearing device by establishing and removing an instable operating mode. The closest prior art of record, Hohmann (US 7,013,015) teaches that, as stated by Applicant on page 8 of the Remarks/Arguments, "feedback would be eliminated when Hohmann's notch filter is activated. Accordingly, the cited combination of references does not teach instability being willingly removed by an individual at a second desired moment". Therefore Hohmann and likewise the other references on record do not disclose the above patentably distinct limitations of the independent claims and it would not have been obvious to one of ordinary skill in the art at the time of the invention to modify the prior art of record to include all the limitations of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
